Teams on full-stack campaign intelligence see 4x ROI vs. manual management

Typical first-audit finding for teams spending $10K+/month on LinkedIn

EVERY PLAN INCLUDES

No features hidden behind a sales call.

Every AdRadar plan comes with the same foundation — full LinkedIn Ads connectivity, CRM integration, and the infrastructure your campaigns need to run with intelligence from day one.

LinkedIn Ads connection

OAuth in seconds. All campaigns, creative history, and audience data ingested immediately. No CSV. No manual wiring.

CRM integration (HubSpot, Salesforce, Pipedrive)

Connect your CRM in minutes and start mapping ad exposure to pipeline, opportunity creation, and revenue.

Revenue attribution model

Every plan includes the revenue attribution model — so you can connect LinkedIn spend to closed deals from day one, not just when you upgrade.

Campaign & ad analytics

Full performance reporting across campaigns, creatives, audiences, and companies — with account-level visibility LinkedIn doesn't natively provide.

Human-in-the-loop by design

Agents recommend. You decide. Every action is explained, logged, and reversible. You are always the captain — no black-box autopilot on any plan.

Setup in under 2 minutes

No implementation project. No onboarding call required. Connect and get your first insights before the first coffee is done.

What teams find when they start using AdRadar.

FREQUENTLY ASKED QUESTIONS

Is there a free trial? Do I need a credit card to start?

Every plan starts with a free trial — no credit card required. Connect your LinkedIn Ads account and get your first insights immediately. You only need to enter payment details when you decide to continue after the trial.

What's the difference between manual blocking (Starter) and auto blocking (Growth)?

Starter includes manual company and title blocking — you review suggestions and apply blocks yourself. Growth upgrades this to fully automated agents that monitor delivery continuously and block off-ICP companies and off-persona titles automatically, without requiring manual review. The agents also log every action and report estimated spend saved.

Can I switch plans after signing up?

Yes. You can upgrade or downgrade at any time. Upgrades take effect immediately. If you downgrade, you retain access to higher-tier features until the end of your current billing period.

What CRMs does AdRadar integrate with?

AdRadar integrates with HubSpot, Salesforce, and Pipedrive on all plans (inbound sync). Pro and Agency plans additionally include outbound CRM sync — writing account scores and journey stage data back to your CRM fields.

How does the Agency plan work for managing multiple clients?

The Agency plan starts at $149/month and includes 2 client workspaces. Additional client accounts can be added at $59/month each. All users across all workspaces are included with no per-seat pricing. Client switching allows you to move between workspaces in one click.

Is annual billing available?

Yes. Annual billing is available at a 20% discount across all plans. Contact us for annual plan pricing — or start on monthly and switch to annual when you're ready.

What happens to my data if I cancel?

Your data remains accessible for 30 days after cancellation. You can export all campaign history, attribution reports, and agent logs before your account closes. After 30 days, data is permanently deleted in accordance with our privacy policy.
